

# Healthy participants needed for a research study

## Study title: Evaluation of Disparities in Sickle Cell Dental Care in Pediatric Patients

- Texas Tech University Health Sciences Center researchers are doing a research study to compare **dental health in pediatric patients with and without sickle cell disease**.
- This study requires participants to go to a single dental visit.
- The study is led by Chibuzo O'Suoji, MD Associate Professor of Pediatrics, Hematology/Oncology Division, Texas Tech University Health Sciences Center School of Medicine, Lubbock, Texas.

### Who can take part?

Healthy kids ages 5-18 are eligible
