

Moses Stephenson

What things have you been able to do today so far?

0:06

I've learned a lot of interesting things, including like, pulses, I actually learned how they work and what to use them for. Ultrasound, I learned how interesting it is, I've never got one and like, just learning about it was actually very interesting. And I liked the fact that you know, they gave us opportunity to see something that we might never see. So it was fun.

What has been your favorite part so far?

0:32

Probably the ultrasound, it's like, it's crazy, like, like soundwaves can be used to actually like, see pictures. That's crazy.

Do you feel like a job in health care is something you want to do?

0:44

I feel like I want to do with like sports medicine. That'd be really interesting because being an athlete myself always thought it was interesting that our trainers know what they're doing and they know exactly what they should do and when to do it. And I think that's pretty interesting. And I feel like I want to help other athletes out.

Has today impacted that decision?

1:05

It influenced my decision and it makes me it kind of encouraged me wanted to, like actually go into medicine like it was always on my mind, but I didn't actually like want to so yeah, now I really kind of just like, want to do it.

How do you feel about interacting with medical students?

1:21

Yeah, they're pretty cool. Like they're they seem very intelligent. And that's what I like. I like intelligent people like to be around intelligent people. So yeah.

Are you enjoying your time here today?

1:32

Yeah, I'm enjoying it a lot it's actually very fun.
